

Protocol; safe swimming in corona time

The government of the Netherlands has given permission to reopen the outdoor pools. From the end of May you can go swimming again in the outdoor pool of Het Verscholen Dorp, but that should be done in a safe way.

Swimming ensures fun, safety and fitness. With these guidelines we want to offer our guests the opportunity to take a dip in our swimming pool. The protocol ensures that everyone can enjoy swimming in a safe and responsible way. In the interest of the public health of the swimmers, the staff at vacation park Het Verscholen Dorp and the visitors, we will implement and enforce the measures in this protocol. In addition, compliance with the rules is necessary for everyone per target group. Only in this way can we together ensure that everyone can use the swimming pool in a safe and responsible manner. Here beneath you can read how this can be done safely and which measures need to be taken to ensure hygiene and disinfection in and around the swimming pool.

Minimize the spread of the coronavirus

In order to minimize the spread of virus particles, RIVM's (Dutch Health Authority) measures apply in the first instance. In addition to keeping a distance, hygiene measures such as washing hands thoroughly in your accommodation before visiting the swimming pool are also required. In addition, there are a number of swimming pool-specific advices:

- Do not go swimming if you have had symptoms of a corona infection in recent weeks.
- Limit the length of your visit to the pool
- Go alone as much as possible
- Don't invite people from outside the park to come for a swim
- It is possible that we will have to close the swimming pool if a "hot spot" of a corona infection is detected in the environment/region.

Optimal disinfection

It is not yet clear whether pool water plays a role in the spread of virus particles. There is a strong suspicion that this could be the case. It is then important to make sure the disinfection is as optimal as possible. The inactivation of COVID-19 in chlorinated pool water takes more minutes than seconds.

What do we do to achieve this?

- We will intensify the disinfection power of the swimming pool water by increasing the desired value of the chlorine and decreasing the desired value of the PH/acidity.
- Our staff will be extra attentive to water quality
- We take care of extra flow and mixing of the pool water
- The pool furniture (picnic tables and sun loungers) will be disinfected every morning.

It could be that increasing the disinfectant power of the bath water has the side effect of possibly forming irritants. We will monitor and adjust this as much as possible

Reduce the risk of contamination

The source of the infection is always a swimmer, who is not yet aware that he/she is a carrier of the virus. Disinfection is the first safety net to kill these coronaviruses. In order to subsequently minimize exposure to the coronavirus for staff and visitors, the following measures apply:

- Maximum flow and mixing of pool water to ensure dilution of the coronavirus
- Do not use swimming nappies for small children
- For swimmers over the age of 18, it is advised to swim with your head above water as much as possible.

- The number of swimmers in the pool will be limited, this means that the pool is only accessible to people who actually stay at the park, so no visits from outside the park.
- We will also limit the swimming time per swimmer
- The opening hours of the swimming pool will also be shortened until further notice.
- After swimming, everyone is requested to leave the pool facility as soon as possible.
- The terrace furniture will also be limited available to meet the minimum distances/guidelines.
- There will be a walking route at the main pool.
- Visitors with underlying suffering are advised not to go swimming for the time being.
- It is possible that we close the pool if there is a "hot spot" of the corona infection in the environment/region.

What does this mean for you in concrete terms?

- Opening hours of the swimming pool are 09:00 to 18:00 hours
 - Maximum number of swimmers at the same time in the large pool: 12
 - Maximum number of persons (toddler with possibly 1 parent) at the same time in the small bath: 4
 - Swimming time per visitor (in case of a crowded bath) 30 minutes
 - Go to the pool just to swim
 - Leave the pool facility a.s.a.p. after swimming
 - Always inquire in advance at the reception in case of restricted access
 - Showering in your own accommodation, both before and after swimming
 - Put on your swimwear at home/your accommodation
 - Mandatory use of a towel
 - Keep a distance of 1.5 meters
 - Follow the mandatory walking route
 - Disinfect your hands at home
 - Take your garbage home
 - The toilets remain closed
 - The shower by the pool is out of order
- Openingstijden van het zwembad zijn 09:00 tot 18:00 uur

Finally, depending on how this protocol behaves in practice, it will be adjusted if necessary to ensure the safety and health of guests and staff as much as possible. The development of the corona situation in the Netherlands and the decisions of the central government may also affect this protocol and may lead to changes in the content of this protocol.

Voorzorgsmaatregelen Coronavirus

Informeer vooraf i.v.m.
beperkte toegang
(max. aantal personen
en openingstijden)

Thuis douchen
voor en na

Trek thuis je
